

$$\underline{a} \cdot (\underline{b} + \underline{c}) = \underline{a} \cdot \underline{b} + \underline{a} \cdot \underline{c}$$

$$\underline{a} \cdot \underline{b} = \underline{b} \cdot \underline{a}$$

properties

Points A, B and C are said to be Collinear if

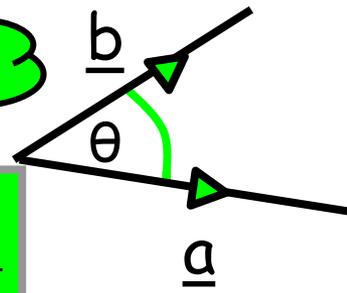

$$\overrightarrow{AB} = k \overrightarrow{BC}$$

AND B is a point in common.

Vector Theory  
Magnitude &  
Direction

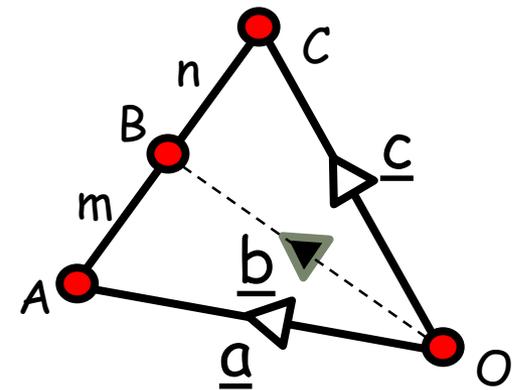

Tail to tail

$$\cos \theta = \frac{\underline{a} \cdot \underline{b}}{|\underline{a}| |\underline{b}|}$$

Angle between  
two vectors

Section formula

$$\underline{b} = \frac{n}{m+n} \underline{a} + \frac{m}{m+n} \underline{c}$$
