

National 4 Relationships Part One Practice Assessment (All)

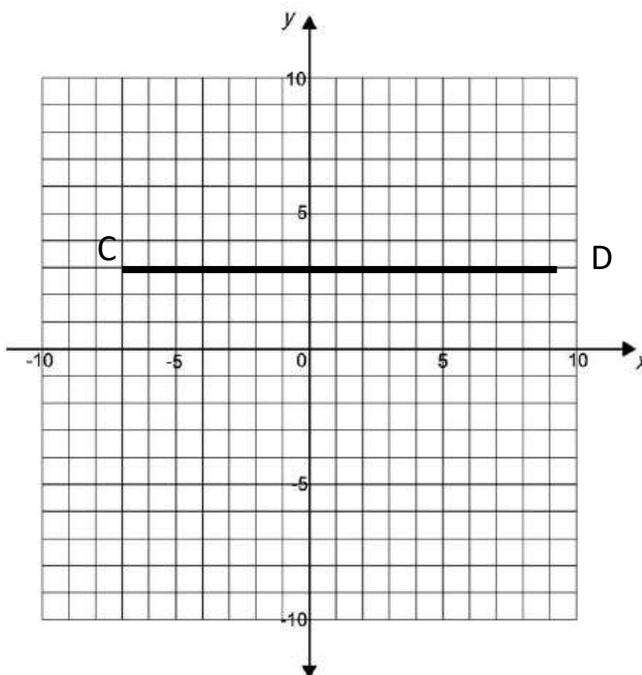

1. Complete the table below for  $y = 2x - 3$

x	1	2	3

2. Line CD is shown on the grid below

Write down the equation of the line CD

3. Solve the following equation:

$$5y + 6 = -9$$

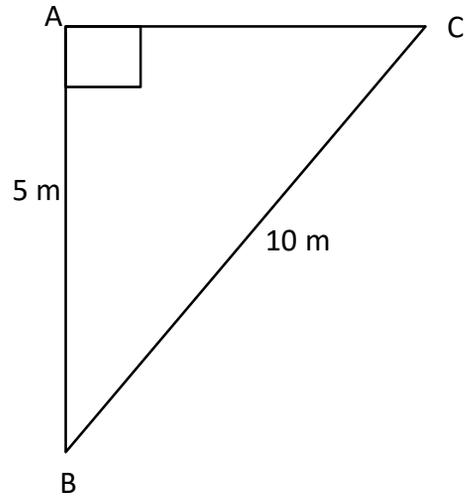

5. Change the subject of the formula to a

$$b = 3a + 5$$

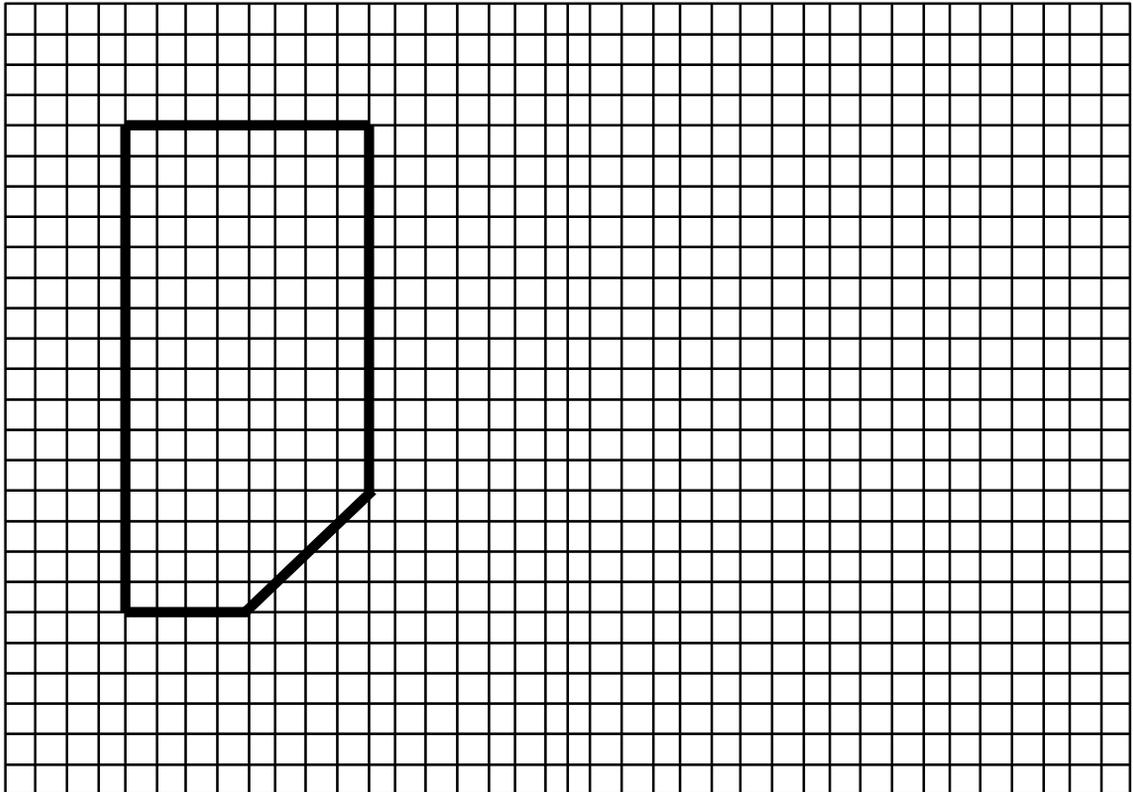

6. Triangle ABC is a right-angled triangle as shown in the diagram below

BC is 10 metres long and AB is 5 metres long.

Calculate the length of AC in metres

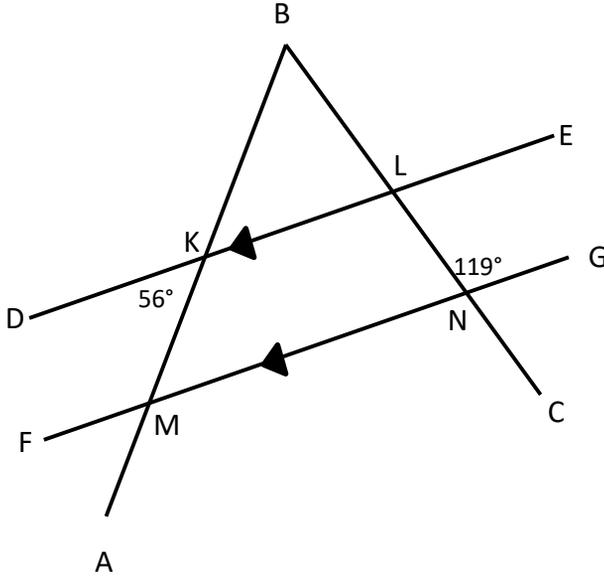

7. On the diagram below, draw an enlargement of the given shape using a scale factor of  $\frac{3}{2}$

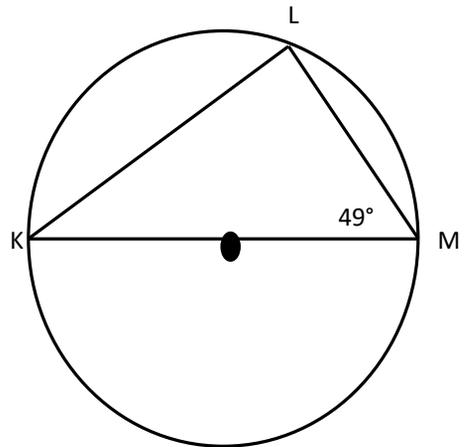

National 4 Relationships Practice Assessment (3)

1. In the diagram below lines DE and FG are parallel  
 Lines AB and BC intersect DE and FG at the points P, Q, R and S as shown.  
 Angle DKM is  $56^\circ$  and angle LNG is  $119^\circ$

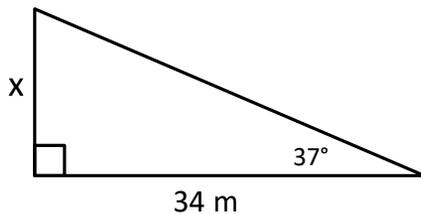

Calculate the size of angle ABC. **All working must be shown.**

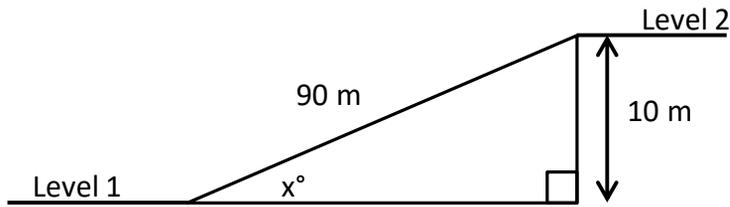

2. CD is a diameter of a circle centre O.  
 L is a point on the circumference of the circle  
 Angle KML is  $38^\circ$  Calculate the size of angle LKM

3. Calculate the length of the side x in the following right-angled triangle below

4. A ramp 120m long slopes at an angle of  $x^\circ$  from Level 1 to Level 2. The height between levels is 12 metres.
- (a) Calculate  $x^\circ$

- (b) For safety reasons  $x$  should be below  $6^\circ$ . Can the angle of the ramp be considered safe ?

5. A class of students sat a Geography and a History test. Here are the students marks

	Geography	History
Tom	84	75
Bob	55	53
Cecil	38	44
Bertie	65	72
Selma	78	85
Louise	66	89
Bruce	57	68

- (a) Draw a scattergraph on the grid provided
- (b) Draw a line of best fit
- (c) Walter scored 60 marks in his geography test. Use your line to estimate the mark that he would have got in his history test
- (d) Oliver scored 75 marks in his geography test but was absent for his history test. His teacher estimated her mark to be 50 for his history test. Is this a reasonable estimate ?

# Marks
