Geometry and Measures 3

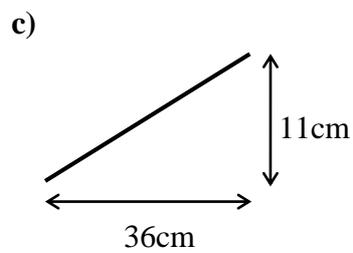

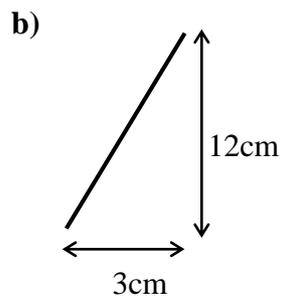

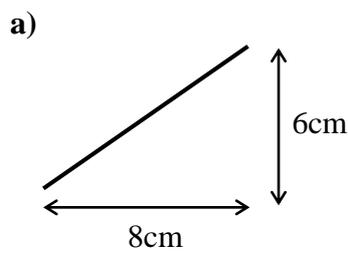

1) Calculate the missing length x in these right-angled triangles.

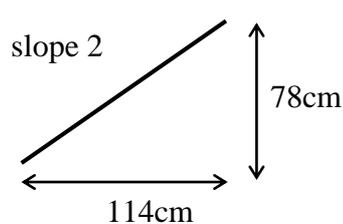

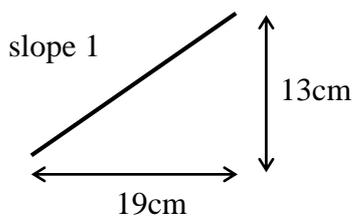

2) Calculate the missing length x in these right-angled triangles.

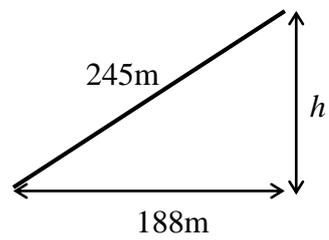

3) Calculate the gradient of these slopes.

4) Which of the two slopes is steeper? Justify your answer.

5) Below is the cross section of a ski slope.

a) Calculate the height h of the ski slope.

b) If the gradient of a ski slope is more than 0.85 then it is regarded as being dangerous. Is the ski slope dangerous? Justify your answer.
